Strategy, Digital Disruption & Organizational Performance Leader

PROFESSIONAL PROFILE

Leader with 14+ years connecting strategy, business, product, technology, and change to turn challenges into operating capabilities and measurable outcomes. He currently designs Data & AI offers and roadmaps at Amaris Consulting; previously, he led regional GenAI adoption and scaled organizational capabilities. He combines digital disruption, organizational design, governance, and change management in partnership with technical specialists, without claiming model-development ownership.

SELECTED IMPACT

- Contributed to annual revenue growth from USD 1M to USD 3M.
- Contributed to improving margin from 35% to 45% while keeping annual attrition below 5% during growth.
- Built and governed a CoE that scaled from 8 to 110+ professionals and supported 160+ concurrent initiatives.
- Led GenAI adoption across six countries and contributed to initiatives reporting ROI above 50%, 30% faster time-to-market, and 30% higher productivity.
- Led transformations associated with CSAT increasing from 70% to 85%+ and time-to-market improving by up to 35%.
- Built a community of 50+ practitioners, with average CSAT of at least 4.6/5.

PROFESSIONAL EXPERIENCE

Senior Consultant / Offer Manager, Data & AI — Amaris Consulting (Mantu)

Jun 2026–Present · Medellín, Colombia

- Leads Data & AI discovery and offer design across use cases, value proposition, scope, operating model, estimates, and roadmap.
- Coordinates commercial, product, data, AI, architecture, and delivery perspectives to build viable decisions and proposals.
- Shapes GenAI, data governance, and AI modernization opportunities for regulated and multinational organizations.

Internal Presales Manager & Regional GenAI Lead — Sofka Technologies

Feb 2025–May 2026 · Latin America

- Aligned business units, AI Champions, governance, and delivery around priority use cases.
- Integrated GenAI into presales, recruiting, onboarding, and software delivery through enablement and responsible adoption.

Manager, Management, Experience & Product CoE — Sofka Technologies

Oct 2020–Jan 2025 · Medellín, Colombia

- Defined the service portfolio, operating model, roles, competencies, OKRs, KPIs, and executive dashboards.
- Connected demand, capacity, economics, quality, and team continuity to lead a growing business unit.

Agile Coach — Sofka Technologies

Mar 2020–Oct 2020 · Medellín, Colombia

- Led digital and cultural transformation by connecting change management, experience, agility, and value-flow improvement.

Product Manager & Transformation Lead — Tech and Solve

Mar 2016–Mar 2020 · Colombia and Panama

- Led product discovery, demand, backlog, and roadmaps for banking and utility clients.
- Aligned business, technology, and change around outcomes, product decisions, and Agile/DevOps ways of working.

Product Manager, Digital Health Transformation — Clínica Pajonal

Feb 2012–Jan 2016 · Colombia

- Defined the vision and roadmap for paperless clinical operations, coordinating clinical, administrative, and technology needs through adoption.

INDEPENDENT INITIATIVE

Founder & Empowerment Officer — Metodología

2025–Present

- Created P.I.V.O.T.E. and agentic assets that turn challenges into governed, reusable, and verifiable workflows.
- Designed guides, assistants, and systems with source control, human oversight, transfer, and continuous improvement.

CAPABILITIES

- Strategy and business-unit leadership: Data & AI strategy, business models, service portfolio, capacity, and economics.
- Digital disruption and AI transformation: value-stream redesign, use cases, GenAI adoption, and roadmaps.
- Organizational performance and value realization: business cases, OKRs, KPIs, executive dashboards, and learning loops.
- Organizational design and change management: operating models, roles, competencies, ADKAR, Kotter, and capability building.
- Product, program, and portfolio leadership: product discovery, prioritization, roadmaps, delivery governance, and dependency management.
- AI operating model and governance: demand, Responsible AI, guardrails, adoption, risk, and human oversight.
- Offer design and consultative presales: discovery, value proposition, scope, estimates, RFPs, and capacity models.
- Agentic systems and transferable capability: prompt and context engineering, source grounding, workflow states, and quality gates.

EDUCATION

- Executive Master's in Artificial Intelligence — IIA, in progress.
- Graduate Specialization in Project Formulation and Evaluation — Universidad de Antioquia, 2014.
- Graduate Specialization in Organizational Control — Universidad EAFIT, 2013.
- Public Accounting — Universidad de Medellín.

LANGUAGES

Spanish native · English B2 / professional working proficiency.
